RE: Feasibility Study, United States Avenue Burn Site, Gibbsboro, New Jersey
The Sherwin-Williams / Hilliards Creek Site, Gibbsboro, New Jersey
Administrative Order Index No. II CERCLA-02-99-2035 (1999)

Dear Ms. Nace,

In fulfillment of Section VII, paragraph 27.f.1. of the above-referenced Administrative Order on Consent (AOC), The Sherwin-Williams Company (Sherwin-Williams) is submitting three copies of the revised Feasibility Study (FS) for the United States Avenue Burn Site located in Gibbsboro, New Jersey. The Sherwin-Williams Company (Sherwin-Williams) is submitting this document in response to the May 1, 2017 letter (received May 5, 2017) from the United States Environmental Protection Agency (EPA) and our subsequent meeting to discuss the document comments on May 15, 2017. We have also included a response to comments based on the various comments raised by the EPA (Attachment 1). This FS evaluates remedial alternatives for soil, sediment, and surface water against the criteria established in the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). As directed by EPA, remedial alternatives for Bridgewood Lake and groundwater are not evaluated.

If you have any questions or need further information, please do not hesitate to contact me at (216) 515-7544 or via email at ken.h.stroebel@sherwin.com.

Sincerely,

Kenneth H. Stroebel
Sr. Project Manager
Corporate Remediation Services
